

Flexible Asset Data Ingestion

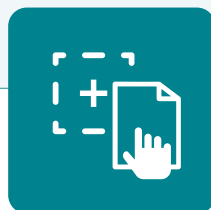

Flyward makes it easy to set up and manage your aircraft and engine data with flexible ingestion options tailored to your needs.

Choose from **four simple ways to get your asset data into Flyward** and start forecasting with accuracy and ease.

Integration with Your Existing Asset Management Systems

- Seamlessly connect Flyward with any of your current asset management systems, with integration support provided for all your tools.
- With direct integration, your data flows securely into Flyward, keeping all information accurate and up-to-date.
- This option enables a hands-off setup for easy, automatic updates and ongoing data alignment.

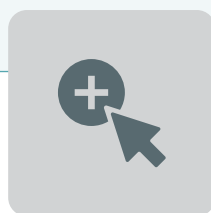

Drag-and-Drop Tech Specs to Auto-Create Assets

- Simply drag and drop your technical specification files into Flyward, and our system will automatically create detailed asset profiles for each aircraft or engine.
- This quick setup option minimizes manual data entry, saving time while ensuring all specifications are ingested correctly.
- Ideal for accelerating asset setup, allowing you to quickly evaluate pricing when buying or selling assets.

Dedicated Support from the Flyward Customer Success Team

- Our Customer Success team is here to guide you through the setup process, from initial data ingestion to system configuration.
- For companies needing extra support, Flyward's experts will assist in creating and managing your asset records, ensuring a smooth transition and helping you maximize Flyward's capabilities.
- A perfect choice for teams that prefer hands-on assistance to optimize their data ingestion and system setup.

Manual Asset Creation for Full Control

- For customers who prefer a custom, hands-on approach, Flyward allows for manual entry of asset data, enabling you to input aircraft and engine information to fit your specific requirements.
- This option is suitable for smaller fleets or customized data points, providing full control over the details of each asset profile.
- With Flyward's user-friendly interface, manual data entry is intuitive and designed to minimize setup time.
